General Notes

On the last page of each expansion, you will find a **Quick Overview** with helpful information about the respective game components. Sometimes, new figures are also included with the expansions. Most of these figures correspond to a certain **type**, which can be identified in the quick overview, too. This is often very helpful in determining the abilities of the individual figures based on the explicit wording in the rules.

For example, when the rules refer to **meeple**, this refers to **all** figures that correspond to the **meeple** type. Therefore the dragon from **Dragon & Fairy** may remove standard meeple as well as any other meeple (and only meeple).

Here is a helpful list of all relevant figures sorted by their type:

Standard Meeple: 

Meeple: 

Special Figure: 

Neutral Figure: 

Some figures do not belong to any type.
Instead, they track certain game progresses: 

It should also be noted that **not every** figure standing in a city, on a road, a field, or monastery automatically takes on the **type** of a **knight**, **traveler**, **farmer**, or **monk**. This is only the case if it is explicitly mentioned in the rules.

For example, you may place the large meeple (**Inns & Cathedrals**) as a knight, traveler, farmer, or monk. Therefore you may assign the builder (**Traders & Builders**) to the large meeple as well as the standard meeple. On the other hand, you may **not** assign the builder to the mayor (**Messengers & Mayors**) because you may place the mayor in a city but **not** as a knight.
The scarecrow, as another example, you may **not place** as a farmer, but it may **turn into** one and then interact with barns (**Castles & Bridges**).

So paying close attention to the explicit wording in the rules can already clear up many questions.

For all other questions, you will hopefully find the necessary answers in the following section. It covers many of the possible combinations between the 10 major expansions and is sorted according to their numbering.

- When scoring a road with one or more inns, you score 2 points for each **land tile** of that road. As usual, you simply count the land tiles, **not** the road segments.
- When scoring a city with one or more cathedrals, you score 3 points for each **land tile** of that city (and each coat of arms). As usual, you simply count the land tiles, **not** the city segments.

- When orienting the dragon, the dragon must face in the direction of a meeple even if the fairy is assigned to it.
- When you place a meeple in a straight line in front, behind, to the left or right of the dragon, you do **not** reorient the dragon as a reaction to that.

- Mayors are only *called to a crisis meeting* when a town hall tile is placed in **Step 1**. Later in the game you may place your mayor on a tile that is adjacent to a town hall tile **without** having to return it.
- If you placed your land tile so that there is an adjacent tile on all 4 sides of it, you may place your **mayor** on it in **Step 2** and **immediately** activate his ability. Then, return your mayor as usual.
  The same applies to your **scarecrow**. If you placed your scarecrow adjacent to 4 other tiles, you may **immediately** activate one of its abilities **or** you must return it as usual.
- The game ends when no player is able to place another tile in their turn, **including** their town hall tile. Skip players if necessary.

- When you play with the mini-expansion **The River**, you place the crown on its predetermined starting space on the tournament tile **before** you place the tournament tile itself. When you finally place the tournament tile, you simply move the crown with it.
- After nominating a meeple as a consequence of continuing its feature in **Step 1**, you may place a meeple in **Step 2** as usual.

- Broken city walls as depicted on the fortress tiles and other tiles of this expansion do **not** alter the scoring of those cities.

- You may build a building **and** place a meeple in the same turn. Even if you build a castle and move a meeple from the city underneath onto it, you may still place a meeple as usual.
- A meeple that is considered a **traveler** on a road is also considered a **traveler** on a bridge.

- If your shepherd is moved or removed for any reason, you must return all flock tokens that were placed next to him to the bag.
  Note: This does not affect any other flock tokens on that field if present.

- When your ringmistress lies on a field in the **final scoring**, she is considered a farmer. She is **not** considered a farmer, traveler, knight or monk **during the game**.

- If you place your large meeple as a traveler or knight, you may assign your builder to it.
- If you place your large meeple as a farmer, you may assign your pig to it.
- You do **not** receive additional goods tokens for completing a city with a cathedral.

- When orienting the dragon, it must face in the direction of a meeple, including large meeple.
- The dragon removes meeple of any type. This includes large meeple as well.
- You may place your large meeple via the magic portal.

- You may **not** place your large meeple as a watchman.

- When you score a road with an inn and with your messenger, you score the bonus for the inn as usual.
- When you score a city with a cathedral and with your messenger, you score the bonus for the cathedral as usual.

- If your large meeple was placed as a traveler, knight or farmer, you may nominate it as usual (when continuing its feature).
- Inns or cathedrals do **not** affect your tournament value.

- You may **not** place your large meeple at a defence post.
- You may have to remove your large meeple as a consequence of an **attack** (as the large meeple is also considered a traveler, knight or monk).

- You may place your large meeple on a bridge as a traveler.
- You may **not** place your large meeple on a castle as a maiden. When scoring your maiden, you score all knights in the playing area, including large meeple in cities.
- If your large meeple was placed as a farmer, you may move it onto a barn.

- You may **not** place your large meeple as an acrobat.
- When scoring a performance token, your large meeple is taken into account.

- The dragon may remove meeple that have a pig or builder assigned to them. In this case you return your pig/builder as well.
- You may assign the fairy to a meeple that has already a pig or builder assigned to it.
- You may assign a pig or builder to a traveler, knight or farmer that you placed via the magic portal.

- You may trigger a double turn by placing a tower tile as usual.
- You may **not** assign a pig or builder to a watchman.

- You may **not** assign the builder to your mayor or messenger.
- You may **not** trigger a double turn by placing your town hall tile.
- If you complete a city by placing your town hall tile, you receive the appropriate goods tokens as usual.
- It is **not** possible to assign your pig to your scarecrow **even if** you place your scarecrow on a tile that is already directly adjacent to 4 other tiles (thus turning it into a farmer).

- You may also nominate a traveler, knight, or farmer if your builder or pig is assigned to them.
- You may **not** trigger a double turn by placing a prize tile. Only when placing the **newly drawn** land tile do you proceed as usual.

- When scoring the pigs, the fortress is considered a complete city.

- You may assign your builder to a meeple when placing it as a traveler on a bridge.
- If you build a bridge that continues a road on which your builder is already present, you **do trigger** the builder.
- If you place a tile in a way that it completes a city that consists of exactly 2 city segments and in which your **builder** is present, you **do trigger** the builder **even if** you then decide to build a castle on it (and move the remaining standard meeple onto the castle as a maiden).
- When you move a farmer with an assigned pig onto the barn, you must return your pig to your supply.

- You may **not** assign your pig to your shepherd.

- You may **not** assign your builder or pig to your ringmistress.
- When scoring a performance token, your builder or pig do **not** score extra points.

- The dragon may remove watchmen on towers but **not** the towers themselves.
- When orienting the dragon, consider watchmen as standing on the tile of their tower.
- You may assign the fairy to a watchman. Place it close to that watchman's tower. When that watchman is moved or removed, you remove the fairy as usual.
- You may **not** place a meeple as a watchman via the magic portal.
- You may also place a watchman on top of a tower if you placed a tile with a **dragon hoard** within that tower's range.

- During a dragon movement, the dragon may move past town hall tiles.
- The dragon may remove mayors, messengers and scarecrows (also scarecrows that turned into a farmer).
- You may assign the fairy to your mayor, messenger or scarecrow.

- The dragon may **not** remove the crown, *although it is made of gold.*
- The dragon may **not** remove emblems on statues.
- When the dragon removes your nominated meeple, you return the corresponding emblem to your supply.
- You may place meeple on tiles with a statue on it (prize tiles) via the magic portal.
- If you *won a prize* and have a **prize tile** in front of you, you draw a land tile as usual. If that land tile depicts a dragon symbol, you resolve it even **before** you place your prize tile.

- During a dragon movement, the dragon may move over the fortress (the two fortress tiles). However, the dragon may **not** remove meeple, **nor** catapults from defence posts.
- When orienting the dragon, the dragon does **not** have to face in the direction of any meeple at defence posts.
- You may **not** place a meeple at a defence post via the magic portal.
- You may **not** assign the fairy to a meeple at a defence post.

Bridges

- During a dragon movement, the dragon may move past bridges and remove meeple on bridges but it does **not** remove bridges.
- You may place a bridge on a tile with a dragon hoard if the usual rules apply.
- You may place a meeple onto a bridge via the magic portal according to the usual rules. However, you may **not** place a meeple onto a bridge if that bridge stands on a tile with a **dragon hoard**.
- You may assign the fairy to a meeple on a bridge.

Castles

- During a dragon movement, the dragon may move past castles but may **not** remove maidens on castles, **nor** castles. *The dragon protects the maiden from knightly admirers.*
- You may build a castle (and place a maiden accordingly) even if it overlaps a tile with a dragon hoard.
- When you build a castle and a **standard meeple** with an **assigned fairy** is already in the corresponding city, you remove the fairy and place it next to the playing area. Move the meeple onto the newly placed castle as usual.
- You may **not** assign the fairy to a maiden.
- You may **not** place a meeple onto a castle or a barn via the magic portal.

Barns

- During a dragon movement, the dragon may move past barns but may **not** remove farmers on barns, **nor** barns. *The farmer is hiding in the barn.*
- You may build a barn (and move a farmer onto it accordingly) even if it overlaps a tile with a dragon hoard.
- When you build a barn and move a farmer **with an assigned fairy** onto it, you remove the fairy and place it next to the playing area.
- You may **not** assign the fairy to a farmer on a barn.
- You may **not** place a meeple onto a barn or a castle via the magic portal.

- The dragon may remove shepherds. If your shepherd is removed, you must return all flock tokens that were placed next to him to the bag.
  Note: This does not affect any other flock tokens on that field if present.
- You may assign the fairy to your shepherd.
- You may place your shepherd via the magic portal according to the usual rules (you must *grow his flock* immediately after).

- The dragon may remove ringmistresses but may **not** remove the Big Top or performance tiles.
- You may assign the fairy to an acrobat even if it stands on top of an acrobat pyramid. In order to assign the fairy to your acrobat you might have to rearrange the pyramid so your meeple stands on the bottom. Then, place the fairy next to it.
- During a dragon movement, if the dragon enters a tile with several acrobats, one of which is protected by the fairy, the fairy itself and the corresponding acrobat are **not** removed. However, all other acrobats on this tile are removed.
- You may place a standard meeple on any acrobat site via the magic portal.
- You may place your ringmistress via the magic portal according to the usual rules.

- You may place a watchman on top of a tower if you placed your **town hall tile** within that tower's range.
- You may **not** place your mayor, messenger or scarecrow as a watchman.

- You may **not** place a watchman on top of a tower as a consequence of placing a **prize tile** within that tower's range.
- After nominating a meeple as a consequence of continuing its feature in **Step 1**, you may place another meeple as a watchman in **Step 2** as usual.
- The tournament tile counts as 6 adjacent land tiles, which must be taken into account regarding the range of the towers.
- If you *won a prize* and have a **prize tile** in front of you, you draw a land tile as usual. If that land tile depicts a thief symbol, you resolve it even **before** you place your prize tile.

- Each fortress tile counts as 6 adjacent land tiles, which must be taken into account regarding the range of the towers.

- When placing a tower tile with a tower floor, you may also build a castle (if appropriate) in the same turn.
- You may build a building **and** place a watchman in the same turn. Even if you build a castle and move a meeple from underneath onto it, you may still place a watchman as usual.

- You may **not** place your shepherd on a tower.

- When scoring a performance token, watchmen on towers are taken into account.

Emblems and nominations

- You may **not** nominate your mayor, messenger or scarecrow. However, you may nominate your scarecrow if it already turned into a **farmer**.
- You may **not** nominate a meeple as a consequence of placing your **town hall tile**.
- When you replace a nominated meeple by activating the mayor's ability, you must return the corresponding emblem to its respective supply.

Town hall tiles and tournaments

- Town hall tiles do **not** count towards tournament values (not even in the field tournament). However, if the 8 tiles adjacent to your nominated farmer include town hall tiles, your tournament value still increases by the number of the potential 16 land tiles surrounding them.
- If you *won a prize* and have a **prize tile** in front of you, before you place it, you draw a land tile as usual **or** you may decide to place your **town hall tile** instead. Either way, you must place the prize tile **first**.
- If you cannot draw a tile because the current tile stack is empty, you may resolve the tournament **or** place your town hall tile instead. If you do **not** place your town hall tile, you **must** resolve a tournament as usual.

Game end

- The game ends when no player is able to place another tile in their turn, **including** their town hall tile. Skip players if necessary. If you not only have your town hall tile but also a **prize tile** in front of you, you **must** place the prize tile **before** you place your town hall tile. When you place your prize tile, you **must** also place your town hall tile if you still have it.

- You may **not** place your mayor, messenger or scarecrow at a defence post.
- You may **not** place a meeple at a defence post as a consequence of placing your mayor, messenger or scarecrow, nor as a consequence of turning your scarecrow into a farmer.
- You must **not** remove your mayor, messenger or scarecrow as a consequence of an **attack**.

- You may **not** build a castle on a city that touches one or more town hall tiles **even if** that city consists of exactly 2 city segments.
- You may **not** place your mayor on a castle, **nor** build a castle on a city that is occupied by your mayor or messenger.
- You may place your messenger on a bridge. Also your messenger may move along bridges as they are part of the road.
- You may move your scarecrow onto a barn if it already was turned into a farmer **or** actually is turned into a farmer in the same turn.
- When scoring your maiden you do **not** score mayors or messengers.

- You may **not** place your mayor, messenger or scarecrow as an acrobat.
- When scoring a performance token, mayors, messengers and scarecrows are taken into account.
- Acrobat sites and circus sites count as **junctions** with regard to your messenger's movement.

- If you remove a nominated meeple as a consequence of an **attack**, return the corresponding emblem to its respective supply.
- If you *won a prize* and have a **prize tile** in front of you, you draw a land tile as usual. If that land tile depicts a siege symbol, you resolve it even **before** you place your prize tile.

Emblems and nominations

- You may nominate a traveler on a road by **continuing** that road with a bridge.
- You may nominate a traveler on a bridge.
- When you move a nominated farmer onto a barn, you must return the corresponding emblem to your supply.

Tournament value

- Each **land tile** with a bridge that continues a road with your nominated meeple on it increases your road tournament value by 1 (just as a tile with a road does).
- Castles or barns do **not** increase any tournament value.

Prize tiles and buildings

- You must **not** build a castle or barn as a consequence of placing a **prize tile**. However, you may make use of its features when placing another tile afterwards to meet the appropriate conditions.

- You may **not** nominate your shepherd.
- You must **not grow** your shepherd's flock, **nor herd** the flock as a consequence of placing a **prize tile**. Only when placing the **newly drawn** land tile do you proceed as usual.

- You may **not** nominate your ringmistress.
- When scoring a performance token, nominated meeple are taken into account as usual.
- If you *won a prize* and have a **prize tile** in front of you, you draw a land tile as usual. If that land tile depicts a circus site, you resolve **Step 1** as usual. Only in **Step 3** do you resolve the circus site (as stated in the rules).

- You must **not** place a standard meeple at the defence post as a consequence of placing a maiden.
- You must **not** remove a maiden as a consequence of an **attack**.
- You may remove a traveler on a bridge as a consequence of an **attack**.

- You must **not** place a standard meeple at the defence post as a consequence of placing your shepherd.
- You must **not** remove your shepherd as a consequence of an **attack**.

- You must **not** place a standard meeple at the defence post as a consequence of placing your ringmistress.
- You must **not** remove your ringmistress as a consequence of an **attack**.
- When scoring a performance token, meeple placed at defence posts are ignored and **not** scored.

- You may **not** place your shepherd onto a barn (the shepherd is not a farmer).

- When your ringmistress lies on a field, she is **not** considered a farmer **during the game** but only in the **final scoring**. Thus, you may **not** place her on a barn.
- You may place a bridge on a tile with a circus site or acrobat site. Bridges do **not** stand in the way of other figures. If figures would physically collide, just place them in a way that they all fit on the land tile.
- You may place your ringmistress on a bridge.
- When scoring a performance token, meeple on bridges are taken into account. However, **maidens** or **farmers on barns** do **not** score points. *They are inside their building and cannot see the performance.*

- When scoring a performance token, your shepherd meeple is taken into account.

Charts

Here you will find all the charts for setting up the game when not only *Jousts & Crests* but additional expansions are added to the game as well.

Adding more expansions to *Jousts & Crests*

The more land tiles are added to the game, the more stacks are formed. This ensures that each player has enough turns to prepare for the next tournament.

Below you will find charts for various land tile counts. Determine the number of tiles you are adding to the game and find the corresponding chart. This will show you exactly how the game will be set up.

Exp. 6 + 20 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	10	6	6	4	3
Prize tiles per stack	1	2	2	3	3
Crown starting place					

Exp. 6 + 40 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	9	6	6	4
Prize tiles per stack	1	1	2	2	3
Crown starting place					

Exp. 6 + 60 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	10	6	6	4
Prize tiles per stack	1	1	2	2	3
Crown starting place					

Exp. 6 + 80 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	12	9	6	6
Prize tiles per stack	1	1	1	2	2
Crown starting place					

Exp. 6 + 100 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	12	10	9	6
Prize tiles per stack	1	1	1	1	2
Crown starting place					

Exp. 6 + 140 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	12	12	9	9
Prize tiles per stack	1	1	1	1	1
Crown starting place					

Exp. 6 + 180 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	12	12	10	9
Prize tiles per stack	1	1	1	1	1
Crown starting place					

Exp. 6 + 220 land tiles (rounded down)

Number of players	2	3	4	5	6
Number of tile stacks	12	12	12	12	10
Prize tiles per stack	1	1	1	1	1
Crown starting place					

Exp. 6 + 260 or more land tiles

Number of players	any
Number of tile stacks	12
Prize tiles per stack	1
